

ATTACHMENT D

Clean Replacement Claim

Following herewith is a clean copy of claim 1, which replaces previous claim 1.

- Q3
1. A method for producing viruses, said method comprising:
 - infecting an avian cell line with a virus, wherein the avian cell line comprises avian embryonic fibroblast cells or their progeny which are immortalized, but untransformed and which comprise, in their genome, the SV40 T+t gene,
 - allowing the virus to propagate, and
 - harvesting the virus.
